

The 8900plus Series

Great storage at a great price

Storage that works for you

At Office Specialty, we know filing better than anyone else. And we know what works for business. Every storage solution is the result of specialized thinking and an in-depth understanding of your storage needs. In order to bring you the best possible value, we've created the 8900plus Series, which incorporates the most popular elements of our specialized storage and filing systems.

Clean, uninterrupted finger pulls, steel ball bearing suspensions, internal leveling glides, 60 standard paint finishes, and rugged durability all make Office Specialty the standard for office storage. It's the easy choice – designed to meet your storage needs with high quality, value-priced units.

It's the easy choice

With a wide array of cabinet heights and 60 standard colors, the 8900plus Series is designed to meet your needs and budget. Built to last, all of our cases are reinforced with heavy-gauge steel channels in the top, back and base. They are then welded together to form a continuous frame, ensuring quiet, trouble-free operation and added protection against everyday wear and tear.

The **8900plus Series** is also fully compatible with our 9900 Series. So when you're ready to expand, upgrading is easy. We've made it our business to specialize in storage solutions that grow with you.

Drawers come in 12" and 15" heights, equipped with fully progressive steel ball bearing suspensions and latch bumpers to prevent "creep-out" and "bounce-back". Leveling glides can be adjusted from inside the cabinet by extending the bottom drawer.

The 8900plus fits your needs – and your budget

Designed for demanding, intensive use, all of our filing units are made with reinforced, heavy-gauge steel, sequenced suspensions and a patented anti-tip system to allow for complete, trouble-free access. But the 8900plus Series most eye-opening benefit is its value – you get the best filing and storage system on the market for a reasonable price.
